DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-8 and 11 are no longer rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant's amendments and remarks have obviated the rejection of record.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-8 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Soane et al. US 6,380,336 in view of Mauer et al. 5,977,228.

4. The rejection set forth under 35 USC 103 in the paper mailed 1/30/09 is deemed proper and is herein repeated. The newly amended claims and remarks filed in support thereof have been fully considered but have been found not persuasive.

5. The Soane patent shows the claimed composition but for the species of plasticizer. The Soane patent generically calls for conventional plasticizers. The Mauer patent shows the claimed plasticizers as conventional plasticizers. One having ordinary skill in the art would be motivated to select the plasticizers in Mauer for use in the compositions of Soane given the reasonable expectation of the resultant composition being plasticized.

Art Unit: 1796

6. Applicant's argue that the claimed esters provide good water and oil repellency without heat treatment when compared with the class of plasticizers used conventionally. Applicants further allege that the class of plasticizers that provide the unexpected results is quite small and that the runs shown in Table 6 substantiate the allegations of unexpected results. This is not persuasive. The results in Table 6 have been fully considered. These fail to support the breadth of the claimed invention. The claims include species not supported by the showing and there are not limitations with respect to the amounts and/or ratios of components. The examples further fail to distinguish the claimed plasticizers from those listed in Mauer. As such, the showing is not representative of the closest prior art.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
